

**FOR YOUTH DEVELOPMENT®  
FOR HEALTHY LIVING  
FOR SOCIAL RESPONSIBILITY**

Dear Health Care Providers and Parents,

In the SAGE Program the health and safety of our students is our number one priority. While our staff is trained in Medication Administration we are not health care professionals. As such, we need your help and cooperation in completing our Medication Authorization Forms in a clear manner to eliminate the possible return of forms (and double the work for parents/guardians) or potential medical error.

Below we have listed a few common items that have continually presented issue:

- Specific instructions: such as, priming instructions for an inhaler
- Dosage: If the dose can be converted between mL and mg, please have that information written down
- Medication Start and Stop Date: needs to be a specific date, per State Regulations
- PRN and Time of Administration: please do not use abbreviations we are not familiar with BID or TID
- PRN: If the medication is listed every 4 hours (Q4), please list why it is needed (i.e. coughing or wheezing)
- Side Effects of Medication: While Benadryl may make one student drowsy, it may make another excited.

We thank you for your help in making our program as safer one.

Sincerely,

**Emily Walter**
